

FOR IMMEDIATE RELEASE

**GREENBELT RESOURCES CORPORATION AND DIVERSIFIED ETHANOL
CONTRIBUTE SYSTEM TO UF BIOREFINERY PILOT PLANT**

GAINSVILLE, FL., Jan. 9, 2012 – Greenbelt Resources Corporation (Pink Sheets: GRCO) today announced that its wholly-owned subsidiary Diversified Ethanol Corporation will supply the distillation and dehydration system in the \$20 million Stan Mayfield Bio Refinery Pilot Plant at the University of Florida Institute of Food and Agricultural Sciences laboratory. University and government officials cut the ribbon today at the Buckeye Technology facility in Taylor County, Florida to commence the project.

The bio refinery plant will identify better ways to produce fuel ethanol from biomass. The Diversified distillation and dehydration system will concentrate the ethanol to appropriate levels for use. Diversified will also provide ongoing technical support and monitoring services with 24/7 network connectivity to the system's process controls from its headquarters in Paso Robles, California. Constant monitoring allows Diversified to remotely address system alerts and advise on system function changes as needed.

"Projects of this scope will help prove the validity of sustainable ethanol alternatives to fossil fuels," said Darren Eng, CEO of Greenbelt Resources Corporation. "We are honored to be selected to work with the team led by the esteemed Dr. Lonnie Ingram."

Greenbelt Resources was selected to participate via public bid process for its three years of experience with membrane distillation technology as well as for the reputation of Diversified technology innovator Floyd Butterfield.

About Greenbelt Resources Corporation

Greenbelt Resources Corporation™ develops and implements technology that makes alternative fuel reliable, practical, and efficient. The company delivers business solutions with integrity and perpetually high quality control through intelligent support services. Greenbelt Resources subsidiary Diversified Ethanol Corporation™ provides end-to-end waste-to-ethanol solutions designed to for localized processing of locally generated waste into locally consumed ethanol.

The company's ethanol plants are built around the award winning Butterfield Closed Cycle System™. Founded in 2001, Greenbelt Resources Corporation is a public company trading under the symbol GRCO.PK.
