

September 30, 2017 Quarterly Financial Statements with
Company Information and Disclosure Statement
For
Greenbelt Resources Corporation

Submitted on:
November 20, 2017

For review by:

Submitted pursuant to and in accordance with
OTC Pink Basic Disclosure Guidelines
(v1.1 April 25, 2013)

Forward-Looking Statements: The statements contained in this document include certain statements, predictions and projections that may be considered forward-looking statements under securities law. These statements involve a number of important risks and uncertainties that could cause actual results to differ materially including, but not limited to, the supply and demand for biofuels, our ability to remain technologically competitive and other economic, competitive and technological factors involving the Company's operations, markets, services, products and prices.

September 30, 2017 Quarterly Financial Statements with Company Information and Disclosure Statement

Prepared and submitted in accordance with OTC Pink® Basic Disclosure Guidelines

OTC Basic Disclosure

1) Name of the issuer and its predecessors (if any)

Greenbelt Resources Corporation (formerly Originally New York, Inc. until June 4, 2007)

2) Address of the issuer's principal executive offices

Company Headquarters

Address 1: 3500 Dry Creek Road, Unit 6
 Address 2: Paso Robles, CA 93446
 Address 3:
 Phone: (888) 995-4726
 Email: info@greenbeltresources.com
 Website(s): www.greenbeltresources.com

IR Contact

Address 1: 3500 Dry Creek Road Unit 6
 Address 2: Paso Robles, CA 93446
 Address 3:
 Phone: (888) 995 -4726
 Email: ir@greenbeltresources.com
 Website(s): www.greenbeltresources.com/investors

3) Security Information

Trading Symbol:	GRCO	
Exact title and class of securities outstanding:	Common Stock	
CUSIP:	910226109	
Par or Stated Value:	\$0.001	
Total shares authorized:	500,000,000	as of: September 30, 2017
Total shares outstanding:	303,612,856	as of: September 30, 2017

Additional class of securities (if necessary):

Trading Symbol:	N/A	
Exact title and class of securities outstanding:	Series B Convertible Preferred Stock	
CUSIP:	None	
Par or Stated Value:	\$0.001	
Total shares authorized:	5,000,000	as of: September 30, 2017
Total shares outstanding:	5,000,000	as of: September 30, 2017

Trading Symbol:	N/A	
Exact title and class of securities outstanding:	Series C Preferred Stock	
CUSIP:	None	
Par or Stated Value:	\$0.001	
Total shares authorized:	5,000,000	as of: September 30, 2017
Total shares outstanding:	5,000,000	as of: September 30, 2017

Transfer Agent

Name: Pacific Stock Transfer Company
Address 1: 4045 South Spencer Street, Suite 403
Address 2: Las Vegas, NV 89119
Address 3:
Phone: (702) 361-3033

Is the Transfer Agent registered under the Exchange Act? Yes: No:

List any restrictions on the transfer of securities: None.

Describe any trading suspension orders issued by the SEC in the past 12 months: None.

List any stock split, stock dividend, recapitalization, merger, acquisition, spin-off, or reorganization either currently anticipated or that occurred within the past 12 months: None.

4) Issuance History

Nine months Ended September 30, 2017

During the period ended September 30, 2017, the Company issued 7,688,282 shares of its common stock at an average price of \$0.043 per share for net proceeds of \$330,000

During the period ended September 30, 2017, the Company issued 5,500,000 shares of its common stock for services valued at \$145,000. The shares were valued based on the fair value of the services received.

During the period ended September 30, 2017 the Company issued a \$10,000 in interest bearing unsecured convertible note which may be repaid in cash or shares of common stock at the option of the Company.

The unsecured convertible note was not registered in any jurisdictions where sold and were sold in reliance on an exemption from registration under the Securities Act of 1933, as amended (the "Securities Act") under Section 4(2) (now Section 4(a) (2)).

Year Ended December 31, 2016

During the period January 1, 2016 through December 31, 2016 the Company issued 8,892,856 shares of its common stock to investors - 5.0 million shares at a price of \$0.005 as consideration for the performance bond guarantee described above and 3,892,856 shares at an average price of \$0.028 per share.

These shares were not registered in any jurisdictions where they were issued and were issued in reliance on an exemption from registration under Section 4(a) (2) or 3(a) (9) of the Securities Act. The certificates representing these shares contained a legend stating that the shares were not registered under the Securities Act and referred to the restrictions on transferability and sale of the shares under the Securities Act.

5) Financial Statements

The following financial statements have been posted through the OTC Disclosure & News Service (otciq.com):

Quarterly Report which includes Consolidated Financial Statements for the three and nine months ended September 30, 2017 and 2016, posted to otciq.com on November 20, 2017 and incorporated herein by reference.

6) Describe the Issuer's Business, Products and Services

A. Description of the issuer's business operations:

Our Business & Systems

Greenbelt Resources Corporation was organized in 2001 under the laws of the State of Nevada as "Originally New York, Inc." We are an early stage, revenue-producing operating company that emerged from the development stage in December 2012. The Company's headquarters are located in Paso Robles, California. The Company is a green technology company and its common stock is quoted on the OTC Pink tier of the OTC Markets Group under the symbol "GRCO."

Greenbelt designs, manufactures, operates and sells modular systems that recycle food wastes and beverage wastes into sellable products. Products produced include ultra-low carbon advanced biofuel, fertilizer, animal feed, electricity and filtered and distilled water.

The innovative advantages of our technology allow our unique approach: the economy of "small" scale. Our "local-scale" technology and approach make it cost-effective to process applicable wastes in quantities available locally.

Each system is an assemblage of individual automated modules collectively controlled and connected by our proprietary software platform. Each module performs a different step in the process. The process for our systems can be broken out into four stages:

Each system is an assemblage of individual automated modules collectively controlled and connected by our proprietary software platform. Each module performs a different step in the process. The process for our systems can be broken out into four stages:

Each module performs a different step in the process. The process for our systems can be broken out into four stages:

- **Feedstock pretreatment:** The *feedstock pretreatment step* (if necessary) prepares the feedstock for fermentation by making simple sugars available. Feedstock processing may include grinding or mashing up solid, and/or adding water, heat, and/or enzymes to break down starches or cellulose into simple

sugars available in a uniformly viscous solution.

- **Fermentation:** The *fermentation step* is the process of adding yeast to a uniformly viscous liquid in which the yeast will consume the sugars and convert them into ethanol.
- **Distillation:** The *distillation step* is the process of separating out the ethanol by boiling the liquid to turn the ethanol, and some of the water into a vapor and then capturing the ethanol through a condensation process. The Company's ethanol plant distillation modules are built around the Butterfield Closed Cycle System™, which is now owned by the Company.
- **End-product production:** The *end-product production step* depends on the specific products being produced. For example, ethanol may require dehydration, for which we use our membrane dehydration module. Stillage may be sold "as is" for use as fertilizer or fortified animal beverage, or customers may request certain components be filtered out for such uses. For example, water may be filtered out and repurposed via additional treatment for sale as distilled or filtered water while the remainder is sold as a high-value high-protein animal feed. In urban deployments, stillage is fed into an anaerobic digester for conversion into biogas (methane). The biogas can be injected into natural gas pipelines where it qualifies for incentive credits, or consumed in an electrical generator to make renewable energy. Where a generator is involved, the heat from its exhaust can be used to replace heat source for the other modules, most notably distillation, thus greatly increasing overall efficiency.

Our systems can be built to our customers' specifications, and can include any or all of the four steps in the process. As a result, the cost of our system can vary widely, depending on the needs of the customer. In 2012, we sold our first system to the University of Florida for an aggregate amount of approximately \$593,000. In 2013, we sold our second system to a group of farmers doing business as Standard Ethanol Pty Ltd. for an aggregate amount of approximately \$1.8 million.

We also operate our own system in a facility in Paso Robles, California that provides a feedstock processing service. In 2006, we acquired technology in a business transaction which was incorporated into a small-scale biomass/waste-to-ethanol pilot plant. This plant was a research and development facility which supported our business model in the biomass/waste-to-energy markets until 2014. During 2014, we transitioned the Paso Robles plant from a research and development facility to an operating plant. It has been used for revenue-producing projects since that time. We have multiple customers at this facility, which produces ethanol and various other products. Assuming that all of the securities offered by us in this offering are sold, we intend to expand our onsite feedstock processing capacity by building a second system in Paso Robles for our own use to both process feedstock and sell the end products produced. We expect that the second system would be operational within nine months of the start of manufacturing.

In addition, in 2015, we began providing contract manufacturing services to third parties. For example, we built a passive alcohol system, a pollution control device that captures and transforms gaseous ethanol emissions into quality spirit products, based on the contracting party's design and specifications. We have also been contracted to manufacture the manifold system used to aggregate and deliver the exhaust gases containing the ethanol vapor stream to the passive alcohol system. We hope to expand the contract manufacturing portion of our business in 2016 and 2017.

Each year, The New Economy magazine announces awards in the areas of cleantech, healthcare, logistics, social responsibility, strategy and technology. In December 2014, The New Economy magazine named our modular small-scale organic waste recycling technology as "Best Biofuels and Biochemicals Solutions" in its cleantech category. We are not affiliated with The New Economy magazine in any way, and we paid no fee to be considered for this award.

Revenue Model

Since 2012, we have generated revenue from the sale of our systems and from annual maintenance fees, and since 2014, we have generated revenue from our feedstock processing services at our Paso Robles facility. We have sold a total of two systems, and are in negotiations to sell additional systems. In the future, we hope to expand our onsite feedstock processing capacity by building a larger second system in California for our own use to both process feedstock and sell the end products produced. In addition, we provide the purchasers

of our systems with ongoing technical support and monitoring services for an annual fee. In the future, we plan to own or partially own complete systems operated either as leased or jointly owned and operated business ventures. We have secured an agreement committing the necessary baseline feedstock to support one such venture and are in negotiations to secure other feedstocks and off-take agreements. Other potential revenue streams include sales of ethanol, fertilizer, animal feed, distilled water and electricity, and payments from a variety of incentive programs.

A myriad of incentive programs apply to our technology, the projects in which we can apply for use and the products we produce. In particular, Greenbelt's is currently included in multiple grant applications for projects using a variety of feedstock types located in various parts of California submitted under a much awaited Assembly Bill 118 Grant Program designed to incentivize Community – Scale biofuel projects.

Also, as noted previously, the low carbon and ultralow-carbon ethanol produced by our systems qualifies for Low Carbon Fuel Standard carbon credits adding to system revenue and overall political and economic benefits of a project.

We also recently launched a new, innovative service in California which allows for the use of our operating commercial facility by third party customers for feedstock feasibility testing. This fee based service allows customers and potential partners to introduce new feedstocks, new feedstock processing techniques or both to evaluate the efficacy of a particular feedstock input to produce ethanol and other outputs.

Beginning in 2015, we also have generated revenue from contract manufacturing services. We are in discussions to expand the contract manufacturing portion of our business in 2016 and 2017.

Manufacturing Our Systems

We have leased space in Paso Robles, CA where we manufacture and assemble, directly and through a third party vendor, the product to be delivered to the customer. Materials generally consist of steel and aluminum piping, various types of electrical components and protective cabling. Labor is obtained on a contract basis and consists primarily of welders and unskilled laborers. There are multiple sources of materials and labor available to us, and the loss of any materials or labor supplier would not have a material adverse effect on our business.

The shipping and delivery of the product to the customer is outsourced to third parties.

Once delivered, a modest amount of set up work and testing at the customer's site is performed by our Chief Technology Officer and Chief Executive Officer.

Our Customers and Markets

A February 2015 report by The Waste & Resources Action Programme and the Global Commission on the Economy and Climate concluded that annually, about 60.0 million metric tons of food is wasted in the United States alone, with an estimated value of \$162.0 billion. In addition, about 32.0 million metric tons of this waste ends up in localized municipal landfills, at a cost of about \$1.5 billion a year to local governments. The report also indicated that the annual global cost of food waste could be as high as \$400.0 billion.

In addition, in the United States, a rapidly growing body of regulation of waste disposal has increased disposal costs, in turn increasing demand for cost effective, environmentally sound alternative solutions for disposal. Food waste landfill bans are increasing. As these initiatives likely will continue to increase for the foreseeable future, our current and potential target markets will continue to establish themselves and expand and grow.

As our system is able to process multiple feedstocks as input, we segment our potential industry target markets by industry/feedstock type. The second level of segmentation is geographic.

Target industry/feedstocks include:

- separated municipal food wastes - food and beverage industry wastes, including brewery waste;
- agriculture and food industry wastes – crop residuals, Greek yogurt production (acid whey), beet tailings, wheat screenings;
- dedicated energy crops and advanced biofuel crops;

- public and institutional food industry waste - hospitals, casinos, prisons, bases, restaurants; and
- other inputs suitable for recycling into ethanol, fertilizer, filtered water and animal feed.

Domestic and international target markets include cities, counties, universities, food producers, beverage makers/distributors, remote rural areas, island communities and developing countries.

As owner or co-owner of a network of deployed systems, we expect our target markets to expand to include not only the waste generators indicated above, but consumers of the outputs, e.g., farmers who are able to utilize outputs as cheaper alternative fuel, animal feed and fertilizer. The latter was the basis of our last system sale to a customer engaged in farming.

Greenbelt initially expects its national rollout to take root in states with proactive regulations in line with the food waste reduction initiatives of the federal and national commercial organizations noted earlier above. Already, states such as Vermont, Connecticut, Massachusetts, and most recently California have banned commercial food waste from going to landfills. In particular, California currently presents a perfect storm of positive factors driving a wave of demand and interest to include our technology in solutions aimed to be deployed around the state. Those factors include the Low Carbon Fuel Program, the AB 118 Community – Bio Fuels Grant Program and physical proximity to Greenbelt operations.

Competition & Barriers to Entry

Initial system deployments are expected to be in the United States, likely in the states of California, Iowa, Massachusetts and New York. Management is exploring options in foreign countries, as well.

Our system is unique with respect to its application of our technology and small scale and footprint and in this respect has no direct competitors. Larger building systems that provide hundreds of millions of gallons of ethanol for a different set of target markets have little interest in investing in our scale of operation. However, our products and services may compete with well established businesses in other industries which provide complementary services. For example, we provide an environmentally sound, cost-effective alternative for certain customers to dispose of the organic waste material and feedstocks we use as a raw material input in our processes in lieu of the current conventional disposal method of arranging for hauling that waste by truck or other mode of transportation.

Competition in our markets will not likely be direct competition from systems producing ethanol and other saleable products, but rather other technological innovations currently not foreseeable.

Unique Value Proposition

We differentiate ourselves by contributing both economic and societal benefits to our customers in local communities, improving local economies and utilizing local resources. Our systems and services can:

- Lower waste disposal costs
- Reduce waste going to landfills
- Reduce feed/fertilizer cost
- Lower local fuel cost
- Lower local energy cost
- Reduce footprint of hauling wastes away and trucking products in
- Mitigate transportation issues in rural communities
- Improve local sanitation (EtOH and distilled water)

Provides a local source for ultra-low-carbon fuel

Challenges

The fundamental challenge for the Company, which dwarfs all others by far, is to acquire capital to fund our operations, infrastructure requirements and the development of sales in our initial target markets. In concert with this is the need to anticipate the market and commence building a system in anticipation of either a future third party sale or for our own use as 6 – 9 months are required to build out. We are, however, cash poor.

The primary segment of our business has been and is capital intensive and requires us to incur significant up front cash outlays prior to matching future cash inflows, analogous to most construction companies. Other revenue streams at times have required customized modification to our processes which again tend to be “up front” costs.

In addition, the sales cycle for our primary system requires a lead time of several months due to the complexity of the product and customer education required.

In summary, the Company, with experienced management and a product line with proven technology evidenced by sales, and with a myriad of potential markets to penetrate, needs capital.

Intellectual Property

There is currently a patent pending on our technology (U.S. Patent Application: 14/263,687), and we believe that we hold certain patent protections and common law trademark and trade name rights. In the future, we may make applications to seek patent protections using best efforts to ensure the rights to all intellectual property potentially held are adequately protected. However, our business is not, and in the future, we do not expect our business to be, dependent on intellectual property, including patents.

Property

The Company leases a 3,500 square foot premises used as an operations facility at 3500 Dry Creek Road, Paso Robles, CA for \$1,925 per month. This facility contains the Company’s own biomass/feedstock to ethanol system and is a month-to-month-tenancy.

The Company owned production system was developed and constructed at an approximate cost of \$1.0 million and is fully depreciated on the Company’s unaudited financial statements as of September 30, 2017.

We believe our current space is adequate for our operations at this time.

Regulation

Our business, products and properties are not subject to any material regulation by federal, state or local governmental agencies.

Employees

We presently have two full-time employees, Messrs. Darren Eng and Floyd Butterfield. We are dependent upon each employee for implementation of our business plans.

B. Date and State (or Jurisdiction) of Incorporation:

March 12, 2001 (Nevada)

C. The issuer’s primary and secondary SIC Codes:

9511

D. The issuer’s fiscal year end date:

December 31

E. Principal products or services, and their markets:

See Item 6(A) above.

7) Describe the Issuer’s Facilities

See Item 6(A) above

8) Officers, Directors, and Control Persons

A. Names of Officers, Directors, and Control Persons.

The following table sets forth the names and ages of each of the persons who are members of our Board of Directors and Executive Officers as of the date of this report:

Name	Position	Age	Term of Office
Darren Eng	Chief Executive Officer President Director	45	October 2009 October 2009 December 2008
Floyd S. Butterfield	Chief Technology Officer Treasurer Secretary Director	61	January 2010 October 2008 November 2010 April 2007
Michael Nakamura	Director	51	July 2016
Joseph Pivinski	Chief Financial Officer, Director	69	July 2016

Darren Eng
Chief Executive Officer, President and Director

darren@greenbeltresources.com

(888) 995-4726

Darren Eng has served as Chief Executive Officer and President of Greenbelt since October 2009, and as a Director since December 2008. Prior to his appointment to CEO, he served as Secretary for the Board from April 2009 to September 2009.

Mr. Eng has over 20 years of experience in executive leadership roles and entrepreneurial endeavors. As founder and President of The Sponsorship Group, he has been titled Executive Director or Senior Vice President of a number of professional organizations operated and managed by The Sponsorship Group. Past senior management positions include Operational Director of Los Angeles Venture Association and Executive Vice President of the Digital Evolution Center. Prior to leading various startup companies and organizations throughout Southern California, Mr. Eng worked for nearly a decade in the environmental industry. From 1994 to 1998, he led teams of scientists and engineers at AECOM (formerly ENSR) as a project and team manager and served as a Level III associate scientist. His work included regulatory compliance and liability assessments of Southern Natural Gas facilities and other large bank-financed industrial properties in the eastern U.S. from Maine to Louisiana.

Mr. Eng earned a Bachelor of Science degree in biology (environmental tract) from Yale University in New Haven, Connecticut. Mr. Eng is Chairperson of the Green LAVA SIG for LAVA.org. He is also a current member of both the Men's Guild for Children's Hospital Los Angeles and the Yale Science and Engineering Association.

Joseph Pivinski

Chief Financial Officer and Director

joe@greenbeltresources.com

(561) 251-1893

Joe Pivinski has served as our Chief Financial Officer since September 2013, as a Director since July 2016 and as our interim Chief Financial Officer from July 2012 to August 2013. Mr. Pivinski was founder and CEO of Business Advisory Services, a company providing financial advisory services, from August 2011 to March 2014. He also served as Chief Financial Officer for Brace Shop, an online internet business to consumer medical device retailer, from January 2014 to May 2014, and as Director of Finance and Human Resources for JKG Group, a marketing communications company, from December 2012 to July 2013. In addition, he served as Executive Vice President and Chief Financial Officer for NV 5, Inc., a professional services firm providing infrastructure testing and compliance and civil engineering services to multiple business sectors, from October 2010 to July 2011, and as a Principal of Alda & Associates Int'l., Inc., a financial consulting company providing services to small and medium sized public companies. Since April 2014, Mr. Pivinski has served as Principal of Nperspective, LLC, through which he provides interim and part-time C-level financial consulting to public and private small and medium-sized companies.

He possesses broad financial management expertise and exposure to a diverse range of industry sectors over a 40+ year career, including consulting, real estate, construction, manufacturing and staffing and engineering services. He has served in leadership positions in public companies as Senior Vice President and CFO of Consolidated Water Co., Ltd., Vice President - Finance and CFO of Oriole Homes Corp. and CFO of the U.S. subsidiary of Adecco, S.A.

In addition, Mr. Pivinski has held C-level and board positions with other public and private organizations, from development stage to \$1.0 billion in revenues, often with direct responsibility for multiple business functions, including human resources, facilities, investor relations and information technology. He has significant experience in regulatory reporting and compliance and accomplishments with international and U.S. capital market transactions and acquisition integration.

Mr. Pivinski holds an MBA – Finance from Fordham University and is a CPA. He is a member of Financial Executives International and the National Association of Corporate Directors in Florida.

Floyd Butterfield

Chief Technology Officer, Treasurer and Secretary and Director

Floydb@greenbeltresources.com

(888) 995-4726

Floyd S. Butterfield has served as the Company's Chief Technology Officer since January 2010. In addition, he has served as our Secretary since November 2010, Treasurer since October 2008 and as a Director since April 2007.

Mr. Butterfield has over 25+ years of experience in the biofuel industry and is the designer of the Butterfield Closed Cycle System™ ethanol plant. With his significant experience in ethanol production from a wide variety of conventional and alternative feedstock's and resource inputs, Mr. Butterfield's innovative approach to alternative fuel production earned him the top award from the California Department of Food & Agriculture and the California Waste Management's Fuel Alcohol Plant Design Competition in the early 1980's.

Previously, he founded FSB Energy, a provider of design, construction and operational consulting services to the biofuel and geothermal industries. Mr. Butterfield also founded and served as COO of Curbside Container Company, where he developed six patents related to recycling containers. He also serves as CEO of FSB Farming, founded in 1983, a diversified farming operation and grower of carrots, spinach and tomatoes for large packing operations.

Mr. Butterfield holds a Bachelor of Arts degree in geophysics from Occidental College and attended the Colorado School of Mines Geophysics master's degree program.

Michael Nakamura
Director

Michael Nakamura has been leading and advising multiple businesses over the last decade. He currently owns and operates DOCNAK Inc., which includes Docnak Financial and Insurance Services, Docnak Photography, Distributors Plus, Lihue Fishing Supply, New York Snow, Xelnt Corp and AMCO Mechanical.

Mr. Nakamura also has 33 years of accomplishments in corporate and entrepreneurial organizations in several different industry sectors. His senior management positions have included Management Consultant at Deloitte, Systems Engineer at IBM and Project Manager at Kaiser Permanente.

Michael possesses expertise in multiple disciplines, including enterprise sales, complex large scale project management, process and methodology improvement, change management and enterprise technology and supply chain integration. A key to his success has been a keen appreciation of the relationships between people, processes and technology. He is the co-author of the Enterprise Technology Operational Readiness ("ETOR") methodology, an analytical project management tool which he has effectively used to build and improve organizations, including several Fortune 500 companies.

Mr. Nakamura is a graduate of the University of the Pacific, California.

See additional information provided below in Item 8C.

Intelligent modular system

B. Legal/Disciplinary History. Please identify whether any of the foregoing persons have, in the last five years, been the subject of:

1. A conviction in a criminal proceeding or named as a defendant in a pending criminal proceeding (excluding traffic violations and other minor offenses);
None.
2. The entry of an order, judgment, or decree, not subsequently reversed, suspended or vacated, by a court of competent jurisdiction that permanently or temporarily enjoined, barred, suspended or otherwise limited such person's involvement in any type of business, securities, commodities, or banking activities;
None.
3. A finding or judgment by a court of competent jurisdiction (in a civil action), the Securities and Exchange Commission, the Commodity Futures Trading Commission, or a state securities regulator of a violation of federal or state securities or commodities law, which finding or judgment has not been reversed, suspended, or vacated; or
None.
4. The entry of an order by a self-regulatory organization that permanently or temporarily barred, suspended or otherwise limited such person's involvement in any type of business or securities activities.
None.

C. Beneficial Shareholders. Security Ownership of Certain Beneficial Owners and Management

The following tables set forth certain information, as of September 30, 2017 with respect to the beneficial ownership of our outstanding common stock and preferred stock by (i) any holder of more than five percent, (ii) each of our executive officers and directors, and (iii) our directors and executive officers as a group.

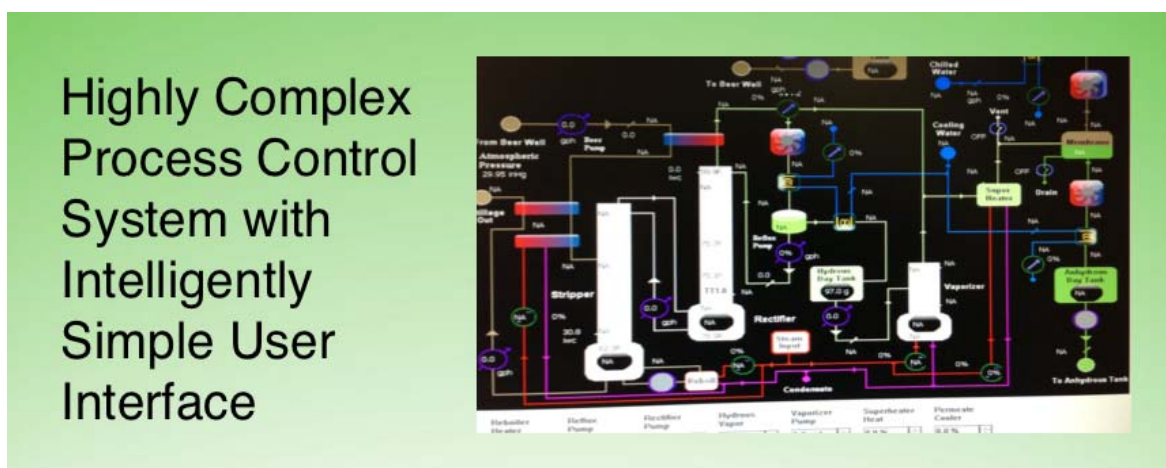

Unless otherwise indicated, the business address of each person listed is in care of Greenbelt Resources Corporation, 3500 Dry Creek Road, Unit 6, Paso Robles, CA 93446. The information provided herein is based upon a list of our shareholders and our records with respect to the ownership of warrants and options to purchase securities in our company. The percentages in the table have been calculated on the basis of treating as outstanding for a particular person, all shares of our common stock outstanding on that date and all shares of our common stock issuable to that holder in the event of exercise of outstanding options,

warrants, rights or conversion privileges owned by that person at that date which are exercisable within 60 days of that date. Except as otherwise indicated, the persons listed below have sole voting and investment power with respect to all shares of our common stock owned by them, except to the extent that power may be shared with a spouse.

Series B Convertible Preferred Stock⁽¹⁾

Name of Stockholder	Amount and Nature of Beneficial Ownership	% of Class
Darren Eng ⁽²⁾	-	-

Notes to Consolidated Financial Statements

Note 1. Business and Nature of Operations

[Greenbelt Resources Corporation](#) (the “Company” or “Greenbelt”) was organized in 2001 under the laws of the State of Nevada as “Originally New York, Inc.” The Company’s headquarters are located in Paso Robles, California.

The Company’s fiscal year end is December 31.

In 2006, the Company’s acquired technology in a business transaction which was incorporated into a small-scale biomass/waste-to-ethanol pilot plant. This plant was a research and development facility which supported the Company’s business model in the biomass/waste-to-energy markets until 2013. During 2013, the plant became operational and used for revenue producing projects. The amount paid in excess of the tangible identifiable value of the technology acquired resulted in Goodwill which was written off in the year ended December 31, 2013.

The Company’s business model is to design, develop, construct and implement technology that makes the production of advanced biofuel reliable, practical, and efficient through the deployment of a network of innovative, cost effective, sustainable energy production systems. The Company is focused on delivering modular solutions designed for localized processing of locally available resources into sellable products.

The small, commercial scale, end-to-end modular systems engineered and constructed by the Company enable the production of commercially-viable advanced biofuel (bio-ethanol) from beverage waste, food waste, energy crops and other cellulosic material with a minimal impact on the environment through energy efficient technology and narrow footprint deployments.

Greenbelt sells its products and services to third parties as well as establishing projects for self-deployment of its technology to address needs for local waste recycling and local energy.

The Company provides end-to-end resource-to-ethanol technology solutions designed for localized processing of locally generated resources (such as waste or energy crops) into locally consumed ethanol, fertilizer and filtered and distilled water. The ethanol dehydration modules are proprietary energy efficient molecular separation systems built around a patent pending module design housing zeolite ceramic membrane tubes.

Greenbelt is a green technology company and its common stock is quoted on the OTC Markets Group, Inc.’s marketplace under the symbol, [“GRCO.”](#)

Note 2. Summary of Significant Accounting Policies

During the year ended December 31, 2012 the Company emerged from the development stage and became revenue producing operational company.

Principles of Consolidation

The consolidated financial statements as of and for the periods ended September 30, 2017 and December 31, 2016 include the accounts of Greenbelt Resources Corporation and its wholly-owned subsidiary Diversified Ethanol Corporation. All inter-company balances and transactions have been eliminated.

Property, Plant and Equipment

Property consisting of office furnishings, the Company’s ethanol facility and related property and equipment is stated at cost, less accumulated depreciation. Depreciation is calculated using the straight-line method over an estimated useful life of 5 years.

Management assesses the carrying value of property and equipment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. If there is indication of impairment,

management prepares an estimate of future cash flows expected to result from the use of the asset and its eventual disposition. If these cash flows are less than the carrying amount of the asset, an impairment loss is recognized to write down the asset to its estimated fair value. As of December 31, 2016, there were no indications of impairment based on management's assessment of these assets.

Revenue and Cost Recognition

Revenue from long-term contracts is recognized on the percentage-of-completion method, measured by the percentage of costs incurred to date to estimated total costs for each contract. This method is used because management considers total costs to be the best available measure of progress on these contracts. Because of inherent uncertainties in estimating costs, it is at least reasonably possible that the estimates used will change within the near term.

Contract costs include all direct materials, labor and indirect costs (such as: contract labor, tools and equipment rentals) related to contract performance. General and administrative costs are charged to expense as incurred. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined.

Changes in estimated profitability resulting from performance, conditions, contract penalty provisions, claims, change orders and settlements are accounted for as changes in estimates in the current period.

The asset "Costs and estimated earnings in excess of billings on uncompleted contracts" represents revenue recognized in excess of amounts billed. The liability "Billings in excess of costs and estimated earnings on uncompleted contracts" represents billings in excess of revenue recognized.

Revenue from contract manufacturing and feedstock testing services is recognized when: (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred and services have been rendered, (iii) the price to the buyer is fixed or determinable, and (iv) collectability is reasonable assured.

Net Income (Loss) per Share and Comprehensive Income (Loss)

Net loss per share is computed by dividing the net loss attributable to the Company that is available to common stockholders by the weighted average number of common shares outstanding. Diluted earnings (loss) per share gives effect to all potentially dilutive instruments which affect common stock, including stock warrants, convertible debt and convertible preferred stock, using the if converted method. Diluted earnings per shares excludes all dilutive potential shares of common stock if their effect is anti-dilutive.

There were no potentially-dilutive securities as of September 30, 2017 and December 31, 2016.

Comprehensive income (loss) is equivalent to net income (loss) for all periods presented.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Such estimates and assumptions impact, among others, the valuation and potential impairment associated with intangible assets, revenue recognition and estimates pertaining to the valuation allowance for deferred tax assets.

These estimates require management to exercise significant judgment and it is reasonably possible that conditions or circumstances considered in formulating an estimate could change. Accordingly, actual results could differ from estimates.

Intellectual Property

The Company currently anticipates certain services and products to be sold under patents, trademarks, trade names and perhaps copyrights.

The Company's business is not, and in the future the Company does not expect its business to be, dependent on intellectual property. However, intellectual property could become significant assets and may provide both product recognition and commercial sale or licensing revenues.

The Company believes it holds certain common law trademark and trade name rights. Additionally, as the Company develops and improves technologies, it will make applications to seek patent protections using best efforts to ensure that rights to all intellectual property potentially held are adequately protected.

There can, however, be no assurance that rights can be successfully asserted in the future or will not be invalidated, circumvented or challenged.

Income Taxes

Income taxes are accounted for under the asset and liability method.

We recognize a liability or asset for the deferred tax consequences of temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements. These temporary differences will result in taxable or deductible amounts in future years when reported amounts of the assets or liabilities are recovered or settled.

Assessing whether our deferred tax asset is realizable requires significant judgment. The ultimate realization of the deferred tax asset is dependent upon future taxable income.

We are also required to recognize the financial statement effect of an uncertain tax position only if it is more likely than not that the tax position will be sustained upon examination by the taxing authorities, based on the technical merits of the position.

There were no unrecognized tax benefits for the periods ended December 31, 2016 and December 31, 2016, respectively.

Share - Based Payment Arrangements

Generally, all forms of share-based payments, including stock option grants, warrants and stock grants are measured at fair value on the awards' grant date, based on estimated number of awards that are ultimately expected to vest. Share-based compensation issued for services rendered are recorded at either the fair value of the services rendered or the fair value of the share-based payments, whichever is more readily determinable. Expense is recognized over the period the payment is earned.

All share-based payments made to date have vested upon issuance and expensed as incurred.

Fair Value of Financial Instruments

The Company measures assets and liabilities at fair value based on an expected exit price as defined by the authoritative guidance on fair value measurements, which represents the amount that would be received on the sale of an asset or paid to transfer a liability, as the case may be, in an orderly transaction between market participants. As such, fair value may be based on assumptions that market participants would use in pricing an asset or liability.

The fair value of financial assets and liabilities can be determined based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value, as follows:

Level 1 – Observable inputs that reflect quoted market prices in active markets for identical assets or liabilities.

Level 2 – Inputs, reflecting quoted prices for identical assets or liabilities in markets that are not active, that are observable for the assets or liabilities or through corroboration with observable market data.

Level 3 – Unobservable inputs reflecting only the Company’s assumptions incorporated in valuation techniques used to determine fair value.

The carrying amount of the Company’s financial assets and liabilities, such as cash, prepaid expenses, and accounts payable and accrued expenses approximate their fair value due to their short term nature. The carrying values of financing obligations approximate their fair values due to the fact that the interest rates on these obligations are based on prevailing market interest rates.

Concentrations

During the years ended December 31, 2016, the Company had one customer who accounted for 91% and 100% of its revenue. No other customer accounted for more than 10% of revenue during the year ended December 31, 2016. During the nine months ended September 30, 2017, the Company had two customers whom accounted for 100% of its revenues. As of September 30, 2017, the Company had an accounts receivable due from two customers.

The Company sells its products in the United States and internationally. The Company’s total international revenue for the periods ended September 30, 2017 and December 31, 2016 were \$ -0-.

Note 3. Stockholders’ Equity

Common Stock

The Company is authorized to issue 500,000,000 shares of common stock, par value \$0.001 per share.

The holders of the Company’s common stock are entitled to one vote for each share held of record on all matters submitted for a vote of stockholders. Holders of common stock have no pre-emptive rights and no right to convert stock into any other security.

The Company’s officers and directors currently own approximately 32.3% of the shares of outstanding common stock.

Common shares issued during the period ended September 30, 2017

During the period ended September 30, 2017, the Company issued 7,688,282 shares of its common stock at an average price of \$0.043 per share for net proceeds of \$330,000.

During the period ended September 30, 2017, the Company issued 5,500,000 shares of its common stock for services valued at \$145,000. The shares were valued based on the fair value of the services received.

Common shares issued during year ended December 31, 2016

During the year ended December 31, 2016, the Company sold 3,892,857 shares of its common stock at an average price of \$0.028 per share for net proceeds of \$108,998.

During the year ended December 31, 2016, the Company issued 5,000,000 shares of its common stock for prior year services valued at \$25,000. The shares were valued based on the fair value of the services received.

During the year ended December 31, 2016 the company issued 1,821,429 shares of its common stock at price of \$0.028 per share for proceeds of \$51,000 received in 2015.

Preferred Stock

Series A Preferred Stock

No Series A Preferred Stock has been authorized.

Series B Convertible Preferred Stock

As of September 30, 2017, 5,000,000 shares of Series B Convertible Preferred Stock, par value \$0.001, were issued and outstanding and held in a Voting Trust, the sole Trustee of which is an officer and director of the Company. Series B Convertible Preferred Stock can only be issued to Company directors.

Each share of Series B Convertible Preferred Stock is entitled to one vote per share at the time of each vote and ordinary dividends only if declared simultaneously with dividends on common shares.

Each share of Series B Convertible Preferred Stock can be converted into one (1) share of Common Stock.

The Series B Convertible Preferred Stock is non-cumulative, has no liquidation value, no put option and is redeemable only by the Company.

Series C Preferred Stock

As of September 30, 2017, 5,000,000 shares of Series C Preferred Stock, par value \$0.001 per share, were issued and outstanding and held by officers and directors of the Company.

The Series C shares divide voting rights equally among the Board of Directors at the time of each vote and have either (a) a 100-to-1 voting right as a group or (b) have a 51% voting right in the event 100-to-1 is no longer a majority vote.

The Series C Preferred Stock is entitled to ordinary dividends only if declared simultaneously with dividends on common shares.

The Series C Preferred Stock is non-convertible, non-cumulative, has no liquidation value, no put option and is redeemable only by the Company.

Note 4. Going Concern

The accompanying consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities in the normal course of business. As shown in the accompanying financial statements, we have incurred a net loss of \$430,858 and used \$597,476 of cash in our operating activities during the year ended December 31, 2017. As of December 31, 2017, a stockholders' deficit of \$660,116 and negative working capital of \$660,116. The Company's ability to continue as a going concern is contingent on securing additional debt or equity financing from outside investors. These matters raise substantial doubt about the Company's ability to continue as a going concern. The accompanying financial statements do not include any adjustments that might result should the Company be unable to continue as a going concern.

Management plans to continue to implement its business plan and to fund operations by raising additional capital through the issuance of debt and equity securities. The Company's existence is dependent upon management's ability to implement its business plan and/or obtain additional funding. There can be no assurance that the Company's financing efforts will result in profitable operations or the resolution of the Company's liquidity problems. Even if the Company is able to obtain additional financing, it may include undue restrictions on our operations in the case of debt, or cause substantial dilution for our stockholders in the case of equity financing.

The Company does not yet have a history of financial stability. The principal sources of liquidity have been the issuance of convertible debt, equity securities and officer loans. The Company emerged from the development stage in 2012 with an accumulated deficit of approximately \$2,900,000.

Note 5. Related Party Transactions

A company in which an officer and director is a cofounder and 10%+ owner provides certain components of Greenbelt's systems. During the period January 1, 2012 through December 31, 2014 Greenbelt committed to pay approximately \$270,000 to this company to incorporate these components into a number of revenue

producing systems and its research and development facility, one of which has not yet been commissioned. At December 31, 2016, the commitment was fully paid and under the terms of the agreement, Greenbelt will be provided with these same components for its next system at no cost (Note 10).

In July, 2016, the Company awarded non-cash share - based compensation in the form of 3.7 million shares of common stock, valued at \$0.035 per share to an officer of the corporation as a performance bonus.

On March 30, 2017 the Company entered into an agreement with a Director to provide consulting with regard to fundraising and system sales on a contingent commission basis. The agreement provides for initial compensation of 1.5 million shares of the Company's common stock and "claw back provisions" typical in this type of agreement.

Note 6. Convertible Notes

On July 30, 2012, the Company issued \$30,000 in interest bearing convertible notes which may be repaid in cash or shares of common stock at the option of the Company. The note is unsecured, with an interest rate of 10%, is due within one year and is convertible into the Company's common stock at \$0.018 per share. At September 30, 2017, \$14,100 of the note was outstanding.

During the year ended December 31, 2014, the Company issued two promissory notes in the aggregate amount of \$22,500. The notes have an interest rate of 10.0%, are due within one year and are convertible into the Company's common stock at \$0.018 per share. At September 30, 2017, \$22,500 of the note was outstanding.

During the year ended December 31, 2015, the Company issued three promissory notes in the aggregate amount of \$90,000. The notes are unsecured, have an interest rate of 10.0%, are due within one year and are convertible into the Company's common stock at prices ranging from \$0.02 to \$0.03 per share. At September 30, 2017, \$90,000 of these notes are outstanding.

During the year ended December 31, 2016, the Company issued two promissory notes in the aggregate amount of \$250,000. The notes are unsecured, have an interest rate of 10.0%, are due within one year and are convertible into the Company's common stock at a price of \$0.028 per share at the option of the Company. At December 31, 2016, \$250,000 of these notes are outstanding.

In 2017, the Company issued a \$10,000 in interest bearing unsecured convertible notes which may be repaid in cash or shares of common stock at the option of the Company. At September 30, 2017, \$10,000 of this note is outstanding.

Note 7. Income Taxes

The Company has net operating loss carry forwards of approximately \$4,300,000 at September 30, 2017 and research and development credit carry forwards of approximately \$120,000, expiring in various periods through 2029. Utilization of the net operating loss carry forwards are and may be limited in the future in the event of ownership changes.

The valuation allowance at September 30, 2017 was approximately \$1,918,573. The increase in the valuation allowance during the nine months ended September 30, 2017 was approximately \$39,500.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred income tax assets will not be realized. The ultimate realization of deferred income tax assets is dependent upon future taxable income.

Management has determined that enough uncertainty exists relative to the realization of the deferred income tax asset balance to warrant the application of a full (100%) valuation allowance as of September 30, 2017.

There was no income tax expense for the periods ended September 30, 2017 and December 31, 2016.

Components of the net deferred tax asset, including a valuation allowance, are approximately as follows:

	<u>Deferred Tax Assets</u>	<u>Valuation Allowance</u>	<u>Balance</u>
Deferred tax assets as of December 31, 2016	\$1,772,073	(\$1,772,073)	\$0
Additions / Reductions	<u>146,500</u>	<u>(146,500)</u>	\$0
Deferred tax assets as of September 30, 2017	<u>\$1,918,573</u>	<u>(\$1,918,573)</u>	

The following is a reconciliation of Federal income tax expense for September 30, 2017 and December 31, 2016:

	<u>2017</u>	<u>2016</u>
Expected income tax benefit at Federal statutory tax rate of 34%	\$146,500	\$22,350
Permanent differences	-	
Valuation allowance	<u>(146,500)</u>	<u>(22,350)</u>
Actual income tax (benefit)	<u>\$-</u>	<u>\$-</u>

The tax effects of temporary differences which were computed at a Federal statutory rate of 34% that give rise to deferred tax asset as of September 30, 2017 and December 2016 were as follows:

	<u>2017</u>	<u>2016</u>
Net operating loss carry forwards	\$146,500	\$22,350
Less: valuation allowance	<u>(146,500)</u>	<u>(22,350)</u>
Net deferred tax assets recorded	<u>\$ -</u>	<u>\$ -</u>

Note 8. Property, Plant and Equipment

Property, plant and equipment consist of the following:

	<u>June 30, 2017</u>	<u>December 31, 2016</u>
Resource-to-Ethanol plant	\$204,527	\$204,527
Equipment, furniture & fixtures	3,000	3,000
Less accumulated depreciation	<u>(207,527)</u>	<u>(204,864)</u>
	<u>\$ -</u>	<u>\$2,663</u>

The Company's resource-to-ethanol plant is deemed to have an alternative future use and the physical component parts of the plant are capitalized and were depreciated over 5 years.

All other research and development costs associated with the design and construction of this plant have been expensed.

Note 9. Goodwill & Other Intangible Assets

The Company's initial Goodwill of \$248,906 was written off in 2013 and consisted of technology acquired and incorporated into the ethanol plant. This plant is currently used in operations.

The Company obtained a provisional patent for a proprietary low cost highly efficient simplified module design to house ceramic membranes and is currently in the process of applying for a permanent patent

Note 10. Commitments and Contingencies

Leases

The Company is obligated under an operating lease agreement for 3,500 square foot premises which contains the Company's own biomass /feedstock to ethanol system. The lease term is month to month with no penalty for termination.

Rent expense for the periods ended September 30, 2017 and December 31, 2016 was \$26,851 and \$22,724, respectively.

At September 30, 2017, minimum future rental commitments are approximately \$3,000.

Employment Agreements

The Company has annual renewable employment agreements with three executive officers. These agreements provide for minimum salary levels, bonus compensation, change of control and other provisions typical of such agreements.

Performance Bond

In 2011, the Company entered into an agreement to issue 20.0 million shares of common stock at \$0.005 per share, as consideration for a commitment to guarantee a Performance Bond related to one of the Company's projects. The agreement also contained other contingent terms and conditions. As of September 30, 2017, all of these shares were issued.

Consulting Agreement Termination

On March 8, 2017 the Company entered into an agreement with a firm to provide consulting services with respect to investor relations and a marketing campaign to enhance awareness of Company operations and increase visibility in the investment community. The agreement provide for initial compensation of 100,000 shares of the Company's common stock at a 40.0% discount to the closing market price on March 8, 2017, a "Lock-Up and Leak-Out provision" typical in these types of agreements and a payment of \$10,000.00 per month in advance, on a month to month basis, unless cancelled by either party. This agreement was cancelled by the Company in August 2017.

Purchase Agreement – Contingent Asset

In 2013 the Company entered into a commitment to pay a supplier in which an officer and director is cofounder and 10%+ owner. The supplier is obligated to deliver component parts of the Company's next ethanol plant when construction commences.

Commitments for Common Stock

The Company entered into several agreements with investors subsequent to September 30, 2017 to issue approximately 1.3 million shares of its common stock at an average price of \$0.06 per share.

Note 11. Subsequent Events

Disclosure and/or adjustment to the financial statements is required for material or significant events affecting the Company through the date subsequent events were evaluated by the Company.

On May 17, 2017 the Company entered into a Letter of Intent with the Andrew J. Young Foundation to provide the design, technology and construction of a turnkey system to support a Biorefinery program to produce Protein Concentrate & Bio – Ethanol from Duckweed on a Foundation site. The parties intend at this time to execute a

Definitive Agreement within 120 days of May 17. The estimated selling price of the system is approximately \$5.0 Million.

On March 1, 2017, the Company entered into a Memorandum of Understanding with PT Jababeka Tbk. This U.S. - Indonesia municipal waste-to-bioproducts alliance is designated JababECO. An initial project, subject to the terms of a definitive agreement, will feature the Company's proprietary technology known as ECOsystem and will process municipal food waste into a myriad of bioproducts. In April, 2017 the Company was registered by the Indonesian government as a certified solution for food waste processing. In June 2017, the company was officially certified in his respect by the Indonesian government.

On August 19, 2016, the Company filed with the Securities and Exchange Commission ("SEC") an offering statement under Regulation A+ - Tier 2 relating to an offering of the Company's common stock by the Company and certain selling shareholders. In November 2017 the Company withdrew this offer due to the potential of alternative financing options and market pricing. The cumulative cost of this offering as of September 30, 2017, which was borne by the Company, was approximately \$119,000.

The preliminary amended offering circular can still be viewed and downloaded from our website at www.greenbeltresources.com/reg-a/ and can be completed by the Company at a future date.
